

# BRISTOL AVON REGATTA

## CIRCULATION PATTERN - WATER

**IMPORTANT - PLEASE READ**

### LEAVING RAFT

Boats will be sent up the course in batches. Racing will be stopped while the convoy proceeds upstream. Each batch will contain about 8 paired-off races.

The Draw specifies the order in which crews must boat and the boating time. Make sure you pair-off with your opposition and take your boats to the launch rafts in the order specified and at the required time.

This is very important for the efficient running of the regatta.

### MARSHALLING

While going up the course boats must not stop or overtake, and must keep up a good speed (a good chance for a warm-up).

All boats should proceed past the start line, find their opposition and turn. Listen carefully to marshal's instructions. Be ready to race as soon as possible.

Do not go through the bridge.

**LOWER NUMBERED CREW ON THE FIELD SIDE**

### RACING

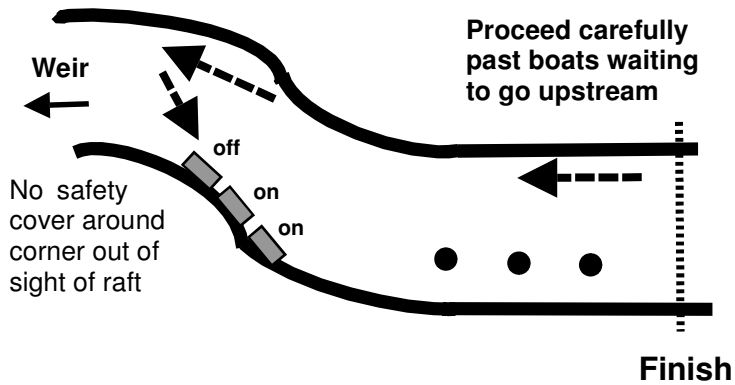

The start is a free start (no stake boats)

Two umpires' boats are moored on the course. Watch out for these.

There are markers every 250m.

**Continued over**

## AFTER RACE

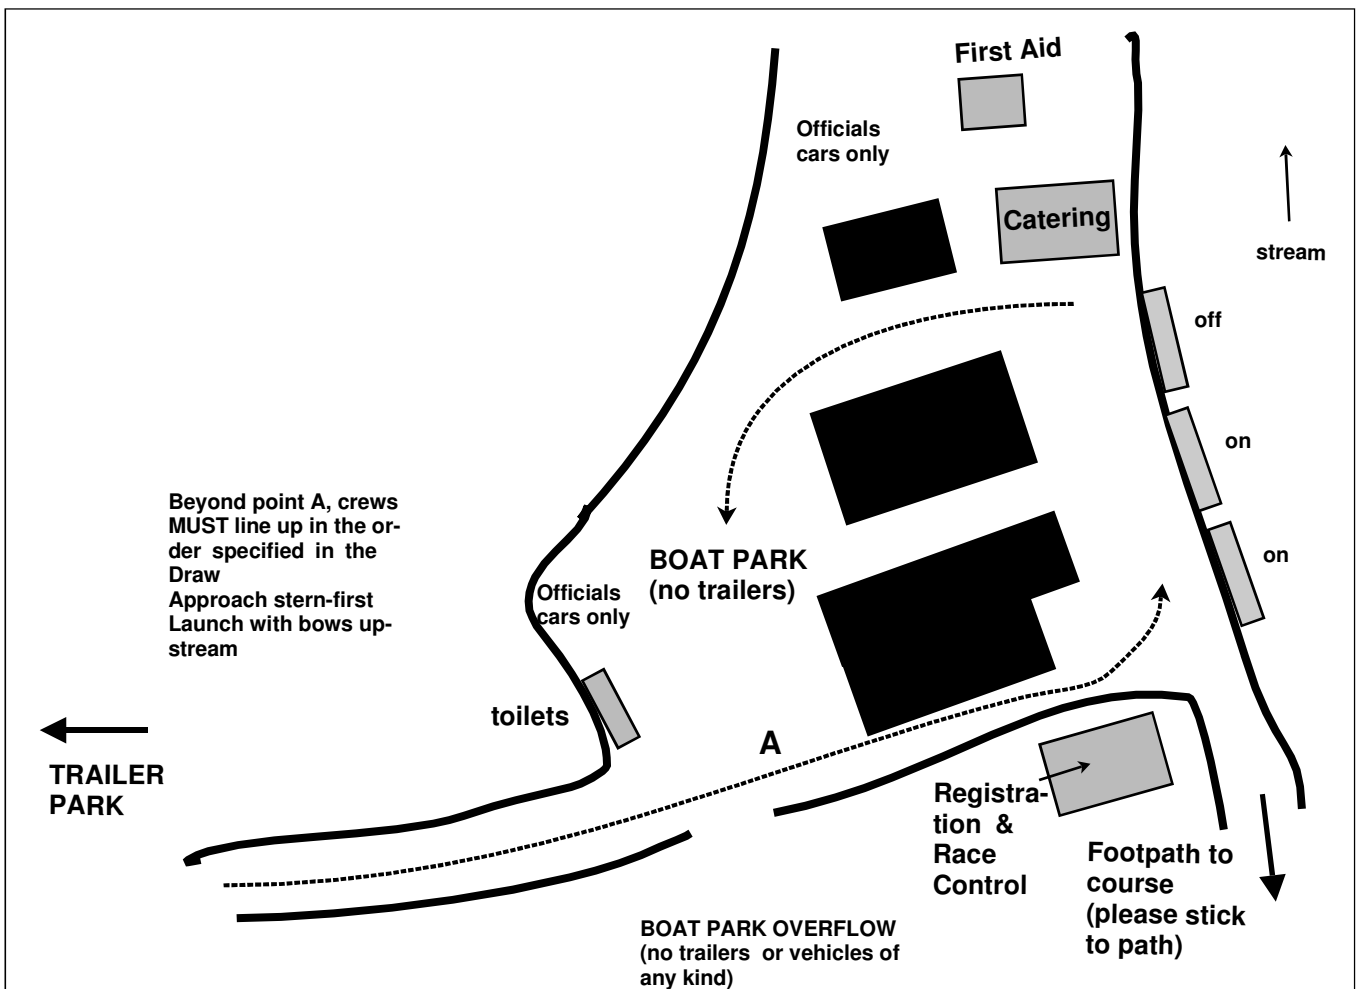

Not to scale

After your race, proceed downstream on the far side. Take care as you pass the boats waiting to go upstream.

Carry on past the rafts listening carefully for marshal's instructions. When instructed, stop, turn and proceed to the "off" raft.

Safety cover stops when you cannot be seen from the raft. A little further downstream there is a weir. Make sure you stop and turn while you can still be seen from the rafts.

## CIRCULATION PATTERN - LAND

**The Regatta Timetable specifies the order in which crews must boat and the boating time. Please find your opposition and make sure you line up at point A in the order specified and in good time for your boating time. This is important for the efficient running of the regatta.**

After your race, you may leave your boat on your trestles in the Boat Park or in the Boat Park Overflow.

Please make sure a channel is left through the Boat Park for emergency vehicles.
